Score: 98

Comments

Team Coordination : The team had maintained good JIRA tickets and the work was split equally among the team members. The team was comfortable working with the members and the scrum master gelled the group together by constant slack and personal meetings.

Achieving the goals : The team completed all the objectives listed as the sprint goals.

Demo : The demo was carried out by the scrum master and all the features listed in the sprint goals were displayed. Some of the use cases missed in the previous sprint were also handled.

Code Quality : Get rid of the code smells and duplication during the next sprint.

Testing : 83% coverage has been achieved.

Overall, great work.
