Comments

Very good work with the final submissions. Very much liked the presentation style. With the team's permission, I'd like to use this presentation as a demo to future classes.

Great decision to the use of the live screen to explain what the team did.

Nice use of Jira for the review of the sprints.

It is unclear if the big finish in sprint 4 was because of good design or putting in overtime. The burn-down rate velocity changed a lot. That's unusual. It would have been good to have listed the storypoints. That would have clarified the question.

Everyone's discussion was good. Clearly the team was tight with TA/Product Manager. Discussion of functionality was solid and impressed as honest. Supported robustly their analysis of performance - nice job.

Content was rich.

Demo would be better if there was a split screen and did more of the simple features (or at least highlighted them in the demo).
