### Comments

Great JIRA tickets

Good use of smart commits

Well documented running code and a coverage ~90%

Scrum master was excellent in leading the team and understanding individual's proficiency in java. Also the team was excellent in coordinating and distributing the goals. The team's goals were achieved and had a good plan for the future sprints as well. One thing is that I would really appreciate is if everyone contributed to the master by pushing their own branch or create a branch from an existing branch and work on the features. Overall, a great team work.
